

## MOM 3D LAYERED ART – SVG & PNG CUT FILES

### Materials.

- Cardstock different colors.
- Vinyl green color for leaves vines (optional)
- Adhesive foamy dots or glue.

### Upload Process

- PNG Images.  
Upload png file and reduce or increase the size according to your preference. PNG images need to be saved as Print then Cut images in Design Space.
- SVG Images.  
Upload file and reduce or increase the size according to your preference. We suggest do not make it too small as design details may not cut perfect such as lines or others.  
Click on “Make it” once you feel your design is ready to cut and DS will show you the layers by color. You can either cut the letters/images all at the same time or cut letter by letter so you can keep the layers order.

### Assembly Process

Each letter has 8 layers and the flower who acts as letter “O” has 6 layers. Start with the last layer all the way to the first one on top. Please check Video below for instructions on how to put layers together as reference.

NOTE: We suggest to make layer #1 for letters M out of vinyl as the pieces are small and it will be easier to attach them to layer #2.
